House Committee Funding Legislation, 109th Congress

Summary

On April 27, 2005, H.Res. 224, providing for the expenses of House committees, other than Appropriations Committee, for the 109th Congress, was adopted by the House by voice vote. On April 21, 2005, Representative Robert Ney, chairman of the Committee on House Administration, introduced the measure, which was referred to the Committee on House Administration. The committee ordered it reported to the House the same day. At the same time, the committee also reportedly adopted regulations limiting committee expenditures for franked mail by committees to \$5,000 per year, and required committees to abide by franking regulations similar to those in force for individual Members.

House Rules required the House of Representatives to act by March 31, 2005, to provide operating funds for its standing and select committees (except for the Appropriations Committee). On March 2, 2005, Representative Bob Ney, chairman of the committee, introduced H.Res. 133 to provide for the continuing expenses of standing and select committees of the House from April 1, 2005, through April 30, 2005. The House adopted the measure by a vote of 406-0 on March 8.

The House Administration Committee typically holds hearings on each committee's request, and the chair of that committee typically introduces an omnibus funding resolution, based on committee requests. The committee held hearings on March 10, and 16, 2005, and received the testimony of committee chairs and ranking minority members.

At the hearing, questions from Members of the House Administration Committee included consideration of the use of the frank by committee chairs, and committee guidelines that provide minority members on panels financed through the House funding process with at least one-third of the committee staff positions, and one-third of committee funds to pay for those positions.

This report, which will be updated as events warrant, provides committee funding requests for the 109th Congress and authorizations for House committees in the 104th - 108th Congresses. CRS Report RL32794, *House Committee Funding Requests and Authorizations, 104th - 109th Congresses*, provides historical and analytical data on funding requests and authorizations for House committees since 1995. Information on Senate committee funding is available in CRS Report RL32779, *Senate Committee Funding Resolutions, 109th Congress, and Funding Authorizations 104th - 109th Congresses*.

House Committee Funding Legislation, 109th Congress

Recent Action

On April 27, 2005, H.Res. 224, providing for the expenses of House committees, other than Appropriations Committee, for the 109th Congress, was adopted by the House by voice vote. On April 21, 2005, Representative Robert Ney, chairman of the Committee on House Administration, introduced the measure, which was referred to the Committee on House Administration. The committee ordered it reported to the House the same day.¹ At the same time, the committee also reportedly adopted regulations limiting committee expenditures for franked mail by committees to \$5,000 per year, and required committees to abide by franking regulations similar to those in force for individual Members.²

House Rules required the chamber to act by March 31, 2005, to provide operating funds for its standing and select committees, except for the Appropriations Committee, which is funded separately through legislative branch appropriations bills. On March 2, 2005, Representative Ney introduced H.Res. 133, to provide for the continuing expenses of standing and select committees of the House from April 1, 2005, through April 30, 2005. The House agreed to suspend the rules and adopt the measure by a vote of 406-0 on March 8.

Measures introduced to fund individual committee activities, were referred to the Committee on House Administration. The committee held hearings on March 10, and 16, 2005, and received the testimony of committee chairs and ranking minority members.

Testimony by the committee chairs reportedly included requests for additional staff; funds for new and existing staff salaries, including cost-of-living increases; proposals to replace office equipment; and funds to upgrade office technologies.³

Questions from Members of the House Administration Committee included consideration of the use of the frank by committee chairs, and committee guidelines

³ Jennifer Yachnin, "House Panels Request More Funding, Space," *Roll Call*, Mar. 14, 2005, p. 1, available at [http://www.rollcall.com/issues/50_86/news/8483-1.html], visited Mar. 17, 2005.

that provide minority members on panels financed through the House funding process with at least one-third of the committee staff positions, and one-third of committee funds to pay for those positions.

Under House Rules, the minority is guaranteed one-third of the first 30 staff positions authorized for a committee, but is not entitled to such a proportion of any additional staff positions. The House Administration committee guidelines reportedly allow for negotiation between a chair and ranking member regarding the exclusion of shared administrative staff who provide services to both parties from the committee staff allocation, and provide the minority with one-third of the remaining positions. Some committees have established such agreements, although most such administrative staff may be majority party staff designees. According to testimony, agreements between other chairs and ranking members include provisions for the joint hiring or minority consultation in administrative staff employment decisions.

House Administration guidelines reportedly also recommend provision of one-third of committee funds for equipment, travel and supplies to the minority. Some ranking minority members testifying at the hearing raised concerns that while those funds are generally available to the minority in most committees, ranking members do not control the funds and must seek approval from committee chairs. In their testimony, some committee chairs noted that minority requests for travel, supplies, and other funds are routinely granted, and that under the Rules of the House, Committee chairs are solely responsible for all committee funds. All Members who testified seemed to agree that, while some disparities among committees on the allocation to the minority of travel funds and office equipment may still exist despite House Administration guidelines, since the 103rd Congress, the minority party has been treated more equitably than before in the allocation of House committee staff and resources.⁴

Typically, following the hearings on committee funding requests, the chair of the House Administration Committee then introduces an omnibus funding resolution, which, after its referral to the House Administration Committee, has traditionally served as the legislative vehicle for a full committee markup. The House normally acts on committee funding resolutions during the last week of March in the first year of a Congress.

On April 21, 2005, Representative Ney introduced H.Res. 224, providing for the expenses of House committees, other than the Appropriations Committee, for the 109th Congress. The measure was referred to the Committee on House Administration, which ordered it reported to the House the same day. At the same time, the committee also reportedly adopted regulations limiting committee expenditures for franked mail by committees to \$5,000 per year, and required

⁴ Unrelated to the funding proposals considered at the hearings, several committee chairs and ranking members reportedly raised concerns regarding the sufficiency of office space in congressional buildings to support staff and committee operations. See *Ibid.*, and Jennifer Yachnin, "Ethics Seeks Big Budget Increase," *Roll Call*, Mar. 17, 2005, p 1, available at [http://www.rollcall.com/issues/50_89/news/8574-1.html], visited Mar. 17, 2005.

committees to abide by franking regulations similar to those in force for individual Members.⁵

On April 27, 2005, the House of Representatives adopted H.Res. 224 by a voice vote.

Table 1 summarizes requests from individual committees and amounts reported by the Committee on House Administration. **Table 2** provides committee funding levels for the 109th Congress, as reported by the Committee on House Administration on April 26, 2005 in H.Rept. 109-54, and authorizations for House committees in the 108th Congress. **Table 3** provides the same information, calculated in constant (January 2005) dollars.⁶ **Tables 4** includes authorizations for House committees in the 104th-108th Congresses in actual dollars. **Table 5** provides the percentage change in committee authorizations in the 105th-109th Congresses, based on actual dollars. **Tables 6** and **7** provide the same information in constant dollars.

House Committee Funding Process

Under House Rule X, clause 6, each standing and select committee of the House (except the Appropriations Committee) is required to submit an operating budget request for its necessary expenses over the two years of a Congress. The budgetary requests include estimated salary needs for staff, costs of consulting services, printing costs, office equipment and supply costs, and travel costs for committee members and staff. Some costs (such as pension and insurance contributions for committee employees) are not directly billed to the committee and are paid from other appropriated funds. Individual committee requests are then packaged by the House Administration Committee into an omnibus “primary expense resolution.”

Clause 6(c) requires that “the minority party (be) treated fairly in the appointment” of committee staff employed pursuant to such expense resolutions. Prior to the 104th Congress, House rules provided a base level of 30 so-called “statutory” staff positions for all House standing committees (except the Appropriations Committee). Funds for these staff were provided through a line-item appropriation and were not included in the funding resolutions reported from the House Administration Committee. In the 104th Congress, House rules were changed to (1) provide for biennial committee funding resolutions, and (2) include funding authorization for the baseline 30 staff positions in each committee’s funding

⁵ Jennifer Yachnin, “New Rules Limit House Committee Funding,” *Roll Call*, Apr. 21, 2005, available at [http://www.rollcall.com/issues/1_1/breakingnews/8973-1.html], visited Apr. 22, 2005.

⁶ CRS Report RL32794, *House Committee Funding Requests and Authorizations, 104th - 108th Congresses*, by R. Eric Petersen, provides historical and analytical data on funding requests and authorizations for House committees since 1995. Information on Senate committee funding is available in CRS Report RL32779, *Senate Committee Funding Resolutions, 109th Congress, and Funding Authorizations 104th - 109th Congresses*, by R. Eric Petersen.

authorization.⁷ Twenty of these positions are allotted to the committee majority and 10 to the committee minority. The House majority leadership has encouraged its committee leaders to move as quickly as possible to provide the minority with one-third of the remaining committee staff and resources authorized in the biennial funding resolutions. Statements made by leaders of the House Administration Committee at the beginning of its committee funding review for the 107th Congress, and reaffirmed at the beginning of the 108th and 109th Congresses, indicate a general consensus that all House committees should provide at least one-third minority staffing this Congress.

Each committee is encouraged to discuss its proposed budget and approve it at a committee organization meeting. Some committees, however, do not prepare or approve their draft budgets this way. Each committee chair normally introduces a House resolution to provide his or her committee with the requisite funds for the two years of the Congress. These individual resolutions are then referred to the House Administration Committee, which holds public hearings on each committee's request. The chair and the ranking minority member from each committee normally testify at these hearings. The committee held hearings on March 10, and 16, 2005, and received the testimony of committee chairs and ranking minority members.

The chair of the House Administration Committee then typically introduces an omnibus funding resolution, which, after its referral to the House Administration Committee, has served as the legislative vehicle for a full committee markup. The chairman's resolution usually incorporates, without change, the amounts requested by each committee.

The House normally acts on committee funding resolutions during the last week of March in the first year of a Congress. The committee funding resolution is normally called up as privileged business under the Rules of the House, allowing it to be called up and considered without the need for a special rule from the Rules Committee. Privileged funding resolutions are considered in the House under the one-hour rule and, typically, the majority party manager does not yield the floor to permit amendments to be offered. (The committee-reported amendment is automatically laid before the House.) At the end of one hour of debate, the majority party manager moves the previous question and, if agreed to, the House votes on final passage of the resolution. Before the vote on final passage, it has become customary for the minority party to offer a motion to recommit the funding resolution. This motion normally permits the minority to offer an alternative funding proposal and to obtain a House vote on it. Owing to the bipartisan consensus on the funding resolution in the past three Congresses, House Democrats did not offer such a motion in 2005, 2003, or 2001.

⁷ As before, these provisions were not made applicable to the House Appropriations Committee.
